This function enables you to specify a range of cells **B3:B17** containing the **Items** and **Criteria** cell **F3** containing the specific **Item** as a condition required for the **Average-range argument** in cells **C3:C17**.

So as illustrated below, the formula is entered into cell **F3.**

We use the formula;

=**AVERAGEIF**(**B3**:**B17**, **E3**, **C3**:**C17**)
