

This means **Electricity** is the **Criterion** that is fulfilled.

If you have several **Criteria** in a large dataset, you must make the cell reference **Absolute** for the **Range** and **Average-range argument**.

That means the formula will now be;

=**AVERAGEIF**(**B$3**:**B$17**, **E3**, **C$3**:**C$17**)

The dollar sign was not added to the **Criteria** cell **E3**, because it will remain relative when you copy and paste the formula. For a large dataset,
