COUNT FUNCTION

The **COUNT** function in Excel is a valuable tool that allows you to count cells with numbers or specific text values within a range.

COUNT has the following syntax:

Count(value1, [value2],....)

For example, to use the **COUNT Function**, you will first need to select the cell (**C18**) in which you intend to display the result.

	A	B	C	D	E	F
1	STAFF OUT STATION EXPENSES					
2	Name	Item	Cost		Item	Average Cost
3	Dodsworth Anne	Electricity	50		Electricity	55
4	Hellung-Larsen Anne	Gas	60		Gas	60
5	Freehafer Nancy	Out to Eat	350		Out to Eat	332.5
6	Cencini Andrew	Fuel	120		Fuel	100
7	Kotas Jan	Phone Call	75		Phone Call	75
8	Fuller Andrew	Vehicel	200		Vehicel	215
9	Sergienko Mariya	Electricity	60			
10	Thorpe Steven	Fuel	90			
11	Neipper Michael	Phone Call	75			
12	Zare Robert	Out to Eat	315			
13	Giussani Laura	Phone Call	75			
14	Hellung-Larsen Anne	Fuel	90			
15	Davolio Nany	Electricity	55			
16	King Roberti	Vehicel	230			
17	Sergienko Maiya	Phone Call	75			
18						

Then, you can type the formula;

=**COUNT**(**C3:C17**)

This will count the number of cells within the range **C3:C17** with numeric
