Column A: 2, 4, 6, 8, 10

Column B: 2, 3, 4, 5, 6

Using the CORRELATION function to be inserted in cell **C2**, calculate the correlation coefficient between the cell ranges **A2** to **A6** and **B2** to **B6** using the following formula:

= **CORREL** (**A2**:**A6**, **B2**:**B6**)

The result appears in decimals.
