

In combination with other logical functions, you can check if a particular cell value is **NOT** greater than 10, by combining it with the **IF** function like this:

=IF(NOT(B3>10),"Not Old Enough","Qualified")

This formula will return "**Not Old Enough**" if the value in cell **B3** is **NOT** greater than **10**, and "**Qualified**" if the value in cell **B3** is greater than **10**.
