8	William P	11	11	South Africa	Qualified
9	Dinara K.	13	14	Ukraine	Qualified

Notice that the **NOT** function also works with a Text value.

Here is another example of nesting the **NOT** function with other logical functions.

If you want to check if a particular cell value is **NOT** greater than 5 **AND** another cell value **NOT** less than 10, you can use the **NOT** function in combination with the **AND** function in this format:

=AND(NOT(B3>5),NOT(C3<10))
