STATUS BAR

The status bar is located at the bottom of the Excel window, which is relatively small but contains information that is displayed when using Excel.

You can quickly personalize the status bar by right-clicking on it to display a list of options to choose from, which you want to appear on the status bar.

A checkmark signifies the item is active or will appear in the status bar. The **Sum** with a check mark means anytime you highlight numbers, they will be computed to get their total automatically.
