worksheet conforms to specific criteria, such as having a certain number of characters. For instance, as illustrated below, you can use the LEN function to check if a telephone number is 10 digits (or 12 characters) long.

| | A | B | C | D | E | F | G |
|---|---|---|---|---|---|---|---|
| 1 | VISA LIST | | | | | | |
| 2 | Name | Age | Phone number | Score | Above 10 | Country | Chracters |
| 3 | James P. | 10 | 202-555-0169 | 11 | YES | Canada | 12 |
| 4 | Paul L. | 9 | 202-555-01077 | 9 | NO | Canada | 13 |
| 5 | Dmitri A. | 5 | 202-555-0128 | 9 | NO | Russia | 12 |
| 6 | Joy D. | 10 | 202-555-0169 | 9 | NO | US | 12 |

You can combine the LEN function with other Excel functions to create more complex formulas. This includes joining the LEN function with the IF function to create a formula that returns a value based on the length of a text string, thereby creating a custom formula that carries out calculations based on specific data points.

| | A | B | C | D | E | F | G |
|---|---|---|---|---|---|---|---|
| 1 | VISA LIST | | | | | | |
| 2 | Name | Age | Phone number | Score | Above 10 | Country | Trasmission Method |
| 3 | James P. | 10 | 202-555-0169 | 11 | YES | Canada | Send SMS |
| 4 | Paul L. | 9 | 202-555-01077 | 9 | NO | Canada | Email |
| 5 | Dmitri A. | 5 | 202-555-0128 | 9 | NO | Russia | Send SMS |
| 6 | Joy D. | 10 | 202-555-0169 | 9 | NO | US | Send SMS |
