The Syntax for VLookup Function is as follows:

**VLOOKUP([value],[range],[column number],[false or true])**

In the example below, we have a list of students, their Faculty, and their score.

We want to find the Score of a particular student quickly in this table.

| | A | B | C |
|---|---|---|---|
| 1 | **Score Sheet** | | |
| 2 | | | |
| 3 | **Student Name** | **Faculty** | **Score** |
| 4 | Adam | Medicine | 64 |
| 5 | Adelin Degroot | Enginnering | 24 |
| 6 | Ben | Education | 63 |
| 7 | Deb | Psychology | 53 |
| 8 | Mckenzy Olds | Law | 30 |
| 9 | Sarah | Law | 43 |
| 10 | Sue | Economics | 34 |
| 11 | Vin | Public Health | 53 |
| 12 | | | |

A portion of the worksheet is used to create a dashboard, where cell **F10** is used to enter the student's name, and cell **F11** is where the score will automatically appear.

So, the VLookup formula is entered in cell **F11**:

=VLOOKUP(F10, A4:C11, 3, 0)
