2						
3	**Student Name**	**Faculty**	**Score**			
4	Adam	Medicine	64			
5	Adelin Degroot	Enginnering	24			
6	Ben	Education	63			
7	Deb	Psychology	53			
8	Mckenzy Olds	Law	30			
9	Sarah	Law	43			
10	Sue	Economics			**Student Name**	Sue
11	Vin	Public Health	53		**Score**	0
12						

Cell **F11** displays the corresponding score along the row that holds the value '**Sue'** within the selected table array. If the text value **Suee** is entered into cell **F10**, which does not exist on the range of cells been considered, cell **F11** will return the Standard error **#N/A**. The reason behind the error is because the VLOOKUP function can't find the value **Suee** in the table array.

When the value **0** or **FALSE** in the VLookup function is changed to **1** or **TRUE**, that is:

=VLOOKUP(F10, A4:C11, 3, **1**) OR =VLOOKUP(F10, A4:C11, 3, **TRUE**)

This will force the VLookup function to find an approximate or closest match with '**Suee'**. In this case, the value '**Suee'**, is close to '**Sue**'.
