For example, in the table below, you have the name of the tenants and their unit numbers.

	A	B
1	**Unit Number**	**Tenant**
2	101	Adam
3	102	Adelin Degroot
4	103	Ben
5	104	Deb
6	105	Mckenzy Olds
7	106	Sarah
8	107	Sue
9	108	Vin

Using the VLOOKUP to find the tenant's name in unit number 105. The numerical value 105 should not be in a quotation mark because it is not a text value.

So the formula now becomes;

=VLOOKUP(105, A1:B9, 2, 0)
