HOW TO SET THE PRINT AREA

To set the Print Area, select the cells you want to include in the printout, then go to the **Page Layout** tab and click the **Print Area** button.

Next, select "**Set Print Area,**".

Only the cells in the defined **Print Area** will be printed.

If the need arises for you to include additional cells in the printout later, go back to the worksheet and select the portion you want to print.

This time, including the new cells in your selection, you return to the **Page Layout** tab and click the "**Clear Print Area**" button followed by "**Set**
