

This is useful if you need to fit more text on a page, create a balanced layout, or add a border to your document.

The **Zoom to Page button** in Excel's Print Preview is a valuable feature you can use to ensure your spreadsheets fittingly appear when printed on paper. It automatically adjusts the zoom level so that the entire worksheet fits on a single page, which is especially useful for large, complex documents. This can save time and resources, allowing you to identify and address any formatting or layout issues before printing.
