PAGE SETUP

Excel's Page Setup feature offers you a variety of customization options to design your worksheet's print settings. You can adjust the page layout, margins, headers, footers, and page orientation according to your preferences. This allows you to set up a worksheet that is aesthetically pleasing and optimized for printing.

To access the **Page Setup** dialog box in Excel, click the **File** tab on the ribbon, then select **Print**. Next, below the **Settings** tabs, click on **Page Setup.**
