
Some of the options available for customizing the headers and footers in Excel include:

- Adding pre-built elements such as page numbers, the date and time, and file path information
- Adding custom text or graphics to the header or footer
- Choosing different alignment options, such as left, center, or right alignment
- Adjusting the margins and spacing of the header or footer
- Formatting the text or graphics in the header or footer, including font size, color, and style

Select either the custom Header or Footer one at a time to add any of these features.
