

1. **OneDrive** allows you to save your workbook using your Microsoft account on the Microsoft cloud storage platform.
2. This PC allows you to save your file on your computer.
3. **Browse** gives you additional privileges to choose where to save your file. This allows you to store your file on an external drive.

So, click on **Browse** to make your choices more flexible.

You will see the **Save As** dialog box on your screen, as illustrated below.
