SORTING AN EXCEL PIVOT TABLE

Sorting an Excel Pivot Table is an advantageous feature that allows you to sort and analyze large volumes of data swiftly and effectively. The Pivot Table, as a robust tool, compresses massive data sets into a well-organized, compact format that can be conveniently sorted and filtered.

Follow the steps below to sort an Excel Pivot Table:

1. Select any cell within the Pivot Table.

1. Click the "**Data**" tab in the ribbon.
2. Click the "**Sort**" button in the "**Sort & Filter**" section.
