

For every item on the list, Excel will generate a pivot table on a fresh worksheet that is filtered for that particular item, and Excel will rename the worksheet to correspond with the item name.

However, any modification you make to the original pivot table will not be updated in the pivot tables of new filter pages. If you want to modify all the reports' layout or style, removing all the filter pages (new worksheets) and creating the reports anew would be advisable.

To see details about the data in a pivotable, double-click on the value, and Excel will take you to another worksheet to help you better understand the
