ADD DATA BARS TO A PIVOT TABLE

Data Bars are used in Excel a lot side a PivotTable to incorporate visual representations of data. These bars are a form of conditional formatting that utilize bars to indicate how the values in a range of cells are compared.

Follow these steps to add Data Bars to your Pivot Table:

1. Click on any of the cells in the pivotable.
2. Go to the **Home** tab on the ribbon and click the **Conditional Formatting** button in the **Styles** group.
3. From the drop-down list, select **Data** Bars.
4. Next, click on **More Rules**
