ENCRYPTING THE ENTIRE WORKBOOK

As I said earlier, when you encrypt an entire workbook in Excel, you secure it with a password, limiting access to authorized users only. This is particularly crucial when the workbook holds confidential data that you wish to keep from unauthorized individuals.

Follow the steps below to encrypt an entire workbook in Excel:

1. Ensure the workbook is open.
2. Click on the **File** tab.
3. On the File tab, click on **Info**.
