SET THE WORKBOOK AS READ-ONLY

To set your workbook as read-only means preventing any modifications from being made to the file. This can protect the workbook's contents from accidental or unauthorized changes. However, this is a low-security measure, as anyone can still view the workbook.

Follow these steps:

1. Ensure the workbook is open.
2. Click on the **File** tab n the ribbon.
3. Click on **Info**.
4. Click on the **Protect Workbook** drop-down button.
5. Click on **Always Open Read-Only**.

1. Save the workbook and close it.

You will get a message when you try to open the workbook again.
