PROTECTING A WORKSHEET

Protecting the worksheets refers to the individual tabs at the bottom of a workbook.

These tabs contain the various sheets that make up the workbook. By organizing your data into different worksheets, you can better categorize and manage your information. You can decide to protect a particular worksheet from being modified.

To do this, follow the steps below:

1. Click on the sheet to make it active.
2. Go to the **Review** tab on the ribbon.
3. In the **Protect Group**, click on the **Protect Sheet** button.
4. Enter the **Password** and then enable the features you want to allow any user to access the worksheet. Else you uncheck all for only to view.
