To navigate the worksheet, you can use your mouse or the arrow keys on your keyboard to move in any direction (up, down, left, or right).

Additionally, you can use the Home, End, Page Up, and Page Down keys on your keyboard to navigate within a worksheet. Keep in mind that the cell where you are currently positioned is considered the **active cell** and will be where any typed data will appear. The active cell is easily identified by its bolder rectangular border.

As soon as you begin typing, the status bar located in the bottom left corner will indicate that you're in **Enter** mode.
