HOW TO CREATE A CUSTOM AUTOFILL SEQUENCE

You can create a custom list to enter data like the Autofill sequence. If you have a list of products or employees in your department, it would be better to add them to a custom list

	A	B
1	Location	**Manager**
2	Building 1	Smith Joe
3	Building 2	Gonzales Gail
4	Building 3	Scote Sheryl
5	Building 4	Kane Kendrick
6	Building 5	Hapsbuch Mark
7	Building 6	Henders Katie
8	Building 7	Atherton Frank
9	Building 8	Bellwood Linda
10	Building 9	Cooper Brent
11		

Rather than continually typing the list of products or staff in your department one after the other in a column or row when necessary, you simply Autofill them in a sequence.

Go to the **File** menu, scroll down, and click on **Options** to open the **Excel Options** dialog box**.**
