CELL FORMATTING

Excel uses the same formatting for all cell content by default, which makes it hard to read a worksheet with a lot of data. You can personalize a workbook using basic formatting methods on a particular section of your worksheet, making it easier to read and comprehend data.

Column(s) or row(s) on your worksheet can be formatted to display data in a format such as percentages (%), currency ($), time, date, etc.

	A	B	C	D	I
1	**Emp ID**	**Last Name**	**First Name**	**Country**	**Pay Rate**
2	1054	Tuome	Alstain	Poland	$ 11.25
3	1056	Tadeuz	Sammler	China	$ 12.25
4	1067	Tammy	Brwyne	China	$ 14.55
5	1075	Pam	Barton	Spain	$ 11.25
6	1078	Tom	Al-Sabah	USA	$ 10.20
7	1152	Tommie	Zostoc	Chile	$ 12.25
