CHANGING FONT TYPE

Calibri is the default font in an Excel workbook.

Under the **Font** group within the **Home** tab, you can find the **Font** command. By selecting a cell, you can view the currently applied **Font Type**. Excel provides a wide range of fonts to modify the appearance of your cell text. The most effective method to become proficient in workbook formatting techniques is to gain experience by utilizing the formatting features available in Excel.

Use the illustration below to practice **Basic Formatting** techniques.

Remember we are using the workbook saved as **Assignment 1,** have yours open on your computer and follow up.
