

5. Once you have made your selections, click OK to continue with the sorting.
6. Alternatively, you can use the Lowest to Highest Sort or the Highest to Lowest Sort buttons located in the Sort & Filter group of the Home tab. By doing so, you can quickly sort a single column.

NOTE: when sorting data in Excel, it's important to note that the software may automatically include or exclude adjacent columns to the sort range. If your data spans multiple columns that need to be kept together, ensure to select all relevant columns before initiating the sorting process.
