formatting.

2. Click the *Conditional Formatting* button within the Styles group on the *Home* tab of the Ribbon.
3. Choose the type of preset rule you want to use from the list of options, such as *Highlight Cell Rules* or *Data Bars.*
4. Select the specific rule you want to use from the submenu, for example, *Greater than*.
5. The *Edit Formatting Rule* dialogue box will now appear, here you can change the formatting options as you prefer. This may include changing the font colour or fill colour, adjusting the data bars or colour scales, or changing other options.
6. Check the preview to make sure the changes are correct, then click OK to apply the formatting..

Using the preset rule with custom formatting, you can quickly apply formatting to data and customize it to suit your needs.

CREATE A NEW CONDITIONAL FORMATTING RULE

To create a new conditional formatting rule, follow the steps below:

1. Select the range of cells where you want to apply the formatting.
2. Select the *Conditional Formatting* icon located in the Styles group of the Home tab ribbon.
3. Choose *New Rule* from the drop-down menu. The *New Formatting Rule* dialogue box will open.
