

4. Select the type of rule you want to create, for example, *Format only cells that contain or Use a formula to determine which cells to format*. The following images illustrate how to set up a rule to format cells whose sales are less than 2,000 monthly.

	A	B	C	D
1	PRODUCT	JAN	FEB	MAR
2	Lemons	2.42100 €	3.43200 €	2.92650 €
3	Apples	0.32100 €	0.20500 €	0.26300 €
4	Peaches	3.34300 €	0.88900 €	2.11600 €

5. Set conditions or criteria for the formatting rule. This may include entering specific values or ranges, selecting a colour scale or data bar, or entering a formula to establish the formatting criteria.
6. Choose the formatting options to apply to cells that meet the conditions of the rule. This may include changing the font colour or fill colour, adding a border, or changing other formatting options.
7. Preview the changes to make sure they are correct, then click *OK* to apply the formatting rule to the selected cells.
