

A scatter chart visually displays data points within a two-dimensional chart, with each data point depicted as a marker or point whose position is determined by its corresponding x and y values. To create a scatter chart in Excel, follow these steps:

1. Enter the data you wish to put in the scatter chart. Specifically, the data must consist of two columns: one for the x-axis and the other for the y-axis.

	A	B
1	**A**	**B**
2	14	2
3	17	3
4	23	6
5	24	7
6	28	7
7	29	8
8	30	13

2. Highlight the data you want to include in the scatter chart.
3. Click the *Insert* tab on the top of the Excel tab and click the scatter chart icon located in the *Charts* group.
