

4. Choose the type of chart best suited to your needs. Excel offers different types of scatter charts, including those with uniform lines or markers.
5. Once you created the chart, you can customize it by adding a title to the chart, axis headings, or adjusting the overall formatting.
6. Then save the chart by clicking on the *File* tab, selecting *Save As*, and choosing the file format in which you want to get the file.

BUBBLE CHART

A bubble chart is a type of chart in which data are displayed in three dimensions: two axes to represent numerical values and a third axis related to the size of the bubbles.
