To create a bubble chart in Excel, follow these steps:

1. Prepare the data in a table with three columns: one for X-axis values, another for Y-axis values, and one for bubble size values.
2. Select the data range of interest and select the *Insert* tab on the Ribbon bar.

A	B	C
A	**B**	**C**
14	2	5
17	3	7
23	6	8
24	7	9
28	7	3
29	8	7
30	13	7

3. Click on the *Insert scatter* chart (X, Y) or bubble chart button in the *Charts* section.
4. Choose the type of *Bubble* chart that best aligns with your needs.

5. Excel will create a default bubble chart with circles of equal size. To tailor the bubble size according to your data, right-click on a bubble and select *Format Data Point*. A dialogue box will appear where you can adjust the *Size* slider or enter a value in the *Size bubble size* to set the bubble dimensions.
