

The combo chart option refers to a chart type where two or more distinct chart types are merged into a single chart. For instance, a combo chart can combine a column chart and a line chart, enabling the presentation of two different types of data within the same chart.

To create a combo chart in Excel, follow these steps:

1. Select the data range you want to include in the chart.

YEARS	PROFITS	EXPENSES
2015	236.00000 €	53.00000 €
2016	257.00000 €	55.00000 €
2017	287.00000 €	79.00000 €
2018	290.00000 €	80.00000 €
2019	325.00000 €	89.00000 €

2. Select the *Insert* tab on the ribbon bar and click the *Combo Chart* icon in the *Chart* group.
