- **Solver**
  The Solver tool is a powerful Excel function that can find the optimal solution to a specific problem. It is useful in solving complex optimization problems that involve minimizing costs or maximizing profits.
- **Goal Seek**
  Goal Seek is a valuable tool that can be used to find a solution to a specific problem. This function operates in reverse, starting from the desired outcome. In such cases, Goal Seek helps to determine the input value required to generate the desired output value.
- **Data Validation**
  This tool restricts cell input to specific data types or predetermined lists.

We will proceed now with a detailed explanations for each of these important features.
