

5. You can customize the layout, formatting and design of the PivotTable or PivotChart using the various options in the Ribbon bar.
6. The PivotTable and/or PivotChart will update automatically whenever you update the data or fields in the *PivotTable Fields* or *PivotChart Fields* section.

USE AN EXTERNAL DATA SOURCE TO CREATE A PIVOTTABLE OR PIVOTCHART

you have the option to utilize external data sources to create PivotTables or PivotCharts. To do so, follow these steps:

1. Prepare the source data. This may be data stored in a separate Excel workbook, a CSV file, or a database. It is essential to ensure that the data is arranged in rows and columns, with each column containing a header.
2. To import external data, click on the Data tab on the ribbon bar and select the option *Use external data source*. This will open a menu where you can choose the type of external data source you wish to use.
3. Connect to the external data source, selecting the specific data you want to import into Excel. You may need to enter login credentials or other information, depending on the type of data source.
