### 3. Name Box

In this section, you can see the name of the active cell, range or object. By typing the object name, you can activate it.

### 4. Application or Windows button

This button can be used to open, close, or minimize the Excel application.

### 5. Worksheet

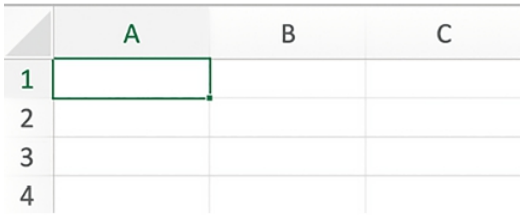

Each sheet in an Excel workbook is a worksheet with infinite rows and columns. Data is entered in individual cells that can contain text, numbers, formulas, and dates.

### 6. Workbook

A workbook is a file which contains one or more worksheets.

### 7. Columns and rows

An Excel worksheet is made up of columns which are arranged vertically and are labelled with letters located at the top of the worksheet. Meanwhile, on the left side of the worksheet, you can find the numbers which identify each row arranged horizontally.

### 8. Cells
