5. Choose This workbook for the saving location.
6. Click *OK* to start the recording.
7. Click on the cell where you want the total to appear and type *Total* in the cell.
8. Select the first empty cell in the branch column and type *=COUNTA(first_value:last_value)*.
9. Select the *Developer* tab and click *Stop Recording* to stop recording the macro.

At this point, you can examine the code of the macro you just created by selecting the Macro item on the *Developer* tab and opening the specific dialog box. Then, choose the *BranchesTotalsRelative* macro and click *Edit* to read the code created by Excel.

This time, the code will look like this:

```
Sub BranchesTotalRelative()
'
' BranchesTotalRelative Macro
'

'
    ActiveCell.FormulaR1C1 = "TOTAL"
    ActiveCell.Offset(0, -1).Range("A1").Select
    ActiveCell.FormulaR1C1 = "=COUNTA(R[-9]C:R[-1]C)"
    ActiveCell.Select
End Sub
```
