

4. The Excel table column will now be reserved for future dates

- **Validation rule for Time**
  An additional step may be to check that all appointments are scheduled between 8.00 and 17.00. In this case, follow these steps:

  1. From the *Allow* box, choose the Time option as the data validation criterion.
  2. When you select the *Time* option, the data validation cells will no longer accept data other than time data.
  3. In the Data Validation dialog box, choose a data condition from the drop-down menu. At this point you will need to enter the time column data validation rule.
