selected cells and choose "*Paste*" from the menu that appears.

In the following section, you will find a detailed overview concerning the process of accessing and entering data in Excel:

1. **Open Excel:** start Excel by clicking on the Excel icon on the desktop or by searching for the program in the *Windows Start menu*.
2. **Open a new workbook:** once Excel is started, an empty workbook will appear. From this point, you can start to create a worksheet and enter your data.
3. **Select a cell:** click on the cell where you want to enter the data. If you need to select multiple cells, you can do it by clicking and dragging the mouse pointer.
4. **Enter data:** if you want to enter data into a cell, you can simply type it. Once again, you can numbers, text, dates, times, etc. Alternatively, you can also utilize the keyboard arrows to navigate between contiguous cells in Excel.
5. **Move to the next cell:** to advance to the next cell, simply press the "*Tab*" key on your keyboard. On the other hand, if you wish to move to the cell below, use the "*Enter*" key instead
6. **Editing data:** to modify the data entered in a cell, you can double-click on the cell or press the "*F2*" key on your keyboard to activate the editing mode. Once the blinking cursor appears, you can make your desired changes and then press "*Enter*" to finalize the edit.
7. **Autofill data:** when dealing with series data that follows a specific pattern in Excel, you can utilize the *autofill feature* to efficiently fill the remaining cells. Simply input the initial value, select the cell, and drag the small black square that appears in the lower right corner of the cell. Continue dragging until all the desired cells are filled, allowing you to complete your data entry tasks quickly and accurately.
8. **Save the workbook:** to prevent data loss, it is recommended to save your Excel workbook periodically. To do so, click on the "*File*" option in the top left corner, then select "*Save As*". Excel will prompt you to choose a location to save the file (such as your desktop or
