2. Choose the *Fill* item in the *Edit* section of the *Home* tab.
3. From the drop-down menu of the *Fill* item, select the desired direction for the *Autofill: Down*, *Right*, *Up* or *Left*.
4. If necessary, you can use the Series dialogue box to enter a series of distinct numbers. To do so, choose the *Series* option from the drop-down menu of the *Filling* item. A window will open with several options for customizing the series.

5. Choose *Rows* or *Columns* in the dialogue box to define the value fill area.
6. In the *Type* menu choose *Linear* and input an increment value along with a limit value. Alternatively, depending on your needs, you can also select a different type like *Growth* or *Date*.
7. Once configured, click on the *Ok* button. Upon returning to the worksheet, you will see the automatic filling of the range with the series you specified.

COPY AND PASTE DATA INTO SELECTED CELLS

When working with Excel, a common task is copying and pasting data from specific cells. To accomplish this, follow these steps:

1. Select the cells you want to copy.
2. Press the *Ctrl + C* keys on your keyboard or right-click and click *Copy* from the context menu.
3. Select the cell where you want to paste the data.
4. Press the *Ctrl + V* keys on the keyboard or right-click and then click Paste from the context menu.
