enter a formula.

3. Type the following formula: *=9*8* and click *Enter*.
4. The formula result will be displayed in the selected cell, and the extended formula will be displayed in the *function bar.*

In the case of multiplication, you can calculate the operation using values from specific cells. Simply enter the cells you want to multiply together, for example: *=A2*A3*.

Excel also features a built-in multiplication function called PRODUCT. To use it, follow these steps:

1. Select the cell where you want to enter the formula.
2. Type the *equal sign (=)* to indicate to Excel that you are about to enter a formula.
3. Type the following formula: *=PRODUCT(9;8)* and press *Enter*.
