

2. Locate the desired function.
   Once the function entry guided procedure begins, proceed as outlined below:

   - If you know the name of the function, enter it in the *Search for a function* field and press *Go*.
   - To find the right function when you do not know it, enter a brief description of the problem you are trying to solve in the *More information about this function* field and press the Go button. For example, you might type something like "*sum cells*" or "*count empty cells*."
   - If you know which of the 13 categories the function falls under, you can select it by clicking on the appropriate icon. Once the category is selected, the functions will be displayed in the *Select a Function* menu. Simply click on the box to access a page that provides a brief explanation of the option you have chosen. For more information, you can click on the *Help link* for this function located at the bottom of the dialogue box.

   Choose the desired option and press the OK button once it is located.
