

## STATISTICAL FUNCTIONS

In addition to the functions covered thus far, Excel offers a wide range of statistical functions essential for conducting various analyses of entered data.

The following sections highlight some of the most useful and user-friendly statistical functions in Excel:

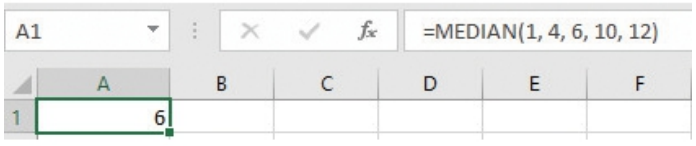

- **AVERAGE Function**
  Enables the calculation of the arithmetic average for a range of numbers.

***=AVERAGE(num1;num2;num3; …)***

- **MEDIAN Function**
  Calculates the average value of a range of numbers.

***=MEDIAN(num1;num2;num3; …)***

- **MODE Function**
  Determines the most frequent value within a specific range of numbers.
