

- **AVERAGEIF Function**
  Calculates the average of the values within a range of cells that meet a predetermined condition.

=AVERAGEIF(range; criteria)

- **STDEV Function**
  Calculates the standard deviation for a range of numbers.

=STDEV(num1;num2;num3; …)

- **CORREL Function**
  This function enables you to calculate the correlation coefficient between two ranges of cells. It’s useful for determining the relationship between two different properties. The formula syntax requires you to select the two arrays you wish to compare:

=CORREL(array1; array2)
