dairy cooperatives to the 42,000 existing societies organized during Phase II. Milk sheds peaked to 173 in 1988-89 with the numbers of women members and Women's Dairy Cooperative Societies increasing significantly.

Major Achievements of the White Revolution.

The phenomenal growth of milk production in India – from 20 million metric tons to 100 million MT with in a span of 40 years was made possible only because of the dairy cooperative movement. This has propelled India to emerge as the largest milk producing country in the World today. It not only achieved self sufficiency but also increased the production infant milk powder very considerably.

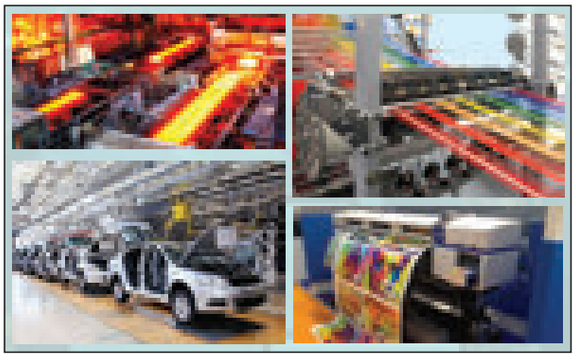

The dairy cooperative movement facilitated the Indian dairy farmers to take interest in cows and buffaloes which has resulted in the 500 million cattle population in the country which is the largest in the world.

The dairy cooperative movement has spread across the length and breadth of the country, covering more than 125,000 villages of 180 districts in 22 states.

The movement has been successful because of a well-developed network of procurement and distribution system with the support of National, State and Village governance.

8.5 Industrialization

Industrialization has been one of the most significant processes in the Indian economic development since independence. After independence, the leaders understood the importance of industrialization for our country. They initiated the process of industrialization under the Industrial Policy Resolution 1956 and in all the five year plans industrialization was given due importance. The initiatives of the governments led to a considerable increase in industrial production making India the sixth most industrial country in the world. The development in industries spread across both small scale and large scale and included consumers, intermediate and capital goods.

Due to the progress in industrialization a change in foreign trade of India could be seen. India increased the export of engineering goods. Correspondingly, there was development of technological and managerial skills as the industries had to be operated and also planning and designing of the industries had to be done in an efficient manner. Heavy industries were developed and high technical capability also had to be developed in terms of improved infrastructure, advanced technology and appropriate production equipments. The engineering industry was the key to the industrial development of India. It had to be developed as per the strategy of the planners to accelerate industrialisation in India.

During the planning process, there was development of basic and capital
