Webserver	A Web server is a Software that uses HTTP (Hypertext Transfer Protocol) to serve the files that form Web pages to users
Web Browser	A Web browser (commonly referred to as a browser) is a software application for accessing information on the World Wide Web. Each individual Web page, image, and video is identified by a distinct URL, enabling browsers to retrieve and display them on the user's device.
SERVER	A server is a computer or a device that provides functionality for other programs or devices, called "clients". This architecture is called the client server model, and a single overall computation is distributed across multiple processes or devices.
