Switch Case:

The switch case is an alternative to the if.. elseif..else statement which executes a block of code corresponding to the match.

Syntax:

```
switch (n) {
   case label1:
      code to be executed if n=label1;
      break;
   case label2:
      code to be executed if n=label2;
      break;
   case label3:
      code to be executed if n=label3;
      break;
   ...
   default:
      code to be executed if n is different from all labels;
}
```

Example:

```
<?php
$favcolor = “red”;
switch ($favcolor) {
   case “red”:
      echo “Your favorite color is red!”;
      break;
   case “blue”:
      echo “Your favorite color is blue!”;
      break;
   case “green”:
      echo “Your favorite color is green!”;
      break;
   default:
      echo “Your favorite color is neither red, blue, nor green!”;
}
?>
```
