1.5.1 Steps in Multimedia Production

Adequate time and efficient planning is required for multimedia production. This assures that the project will proceed smoothly and ensures that the information reaches the target audience. Following are the phases for development of complex multimedia projects.

1. **Conceptual Analysis and Planning**

   The process of multimedia making begins with a conceptual ignition point. Conceptual analysis identifies a appropriate theme, budget and content availability on that selected theme. Additional criteria like copyright issues also are considered in this phase.

2. **Project design**

   Once the theme is finalized objectives, goals, and activities are drawn for the multimedia project. General statements are termed as goals. The specific statements in the project is known as the objectives. Activities are series of actions performed to implement an objective. These activities contribute to the Project design phase.

3. **Pre-production**

   Based on the planning and design, it is necessary to develop the project. The following are the steps involved in pre-production:

4. **Budgeting**

   Budgeting for each phases like consultants, hardware, software, travel, communication and publishing is estimated for all the multimedia projects.

5. **Multimedia Production Team**
