

## 10.2 History of Computer Networking and the Internet

The history of computer networks and its development were briefly explained in the table given below:

**Table 10.1 History of computer Networking**

| S. No | Period | Method | History |
|---|---|---|---|
| 1 | Late 1950 | SAGE (Semi – Automatic Ground Environment) | It was used at U.S Military Radar system. |
| 2 | 1960 | SABRE(Semi Automatic Business Research Environment) | At Commercial Airline Reservation system online connected with two main frame computers. |
| | | Packet switching | **Packet switching** was developed by **Paul Baran** and **Donald Devices** to transfer the information between computers and network.<br>**NPL** network (**National Physical Laboratory** ) at united kingdom local area network (LAN) using line speed of 768kbit/s was implemented by Davies pioneered |
| 3 | 1963 | Intergalactic Computer network | Intergalactic Computer network was send by J.C.RLicklider to his office colleagues discussing about this concept, a computer network engaged to access communication with users of computers. |
| 4 | 1965 | Telephone switch | At first widely used Telephone switch was introduced by **Western Electric** which implemented true computer control. |
