Explorer, Yahoo, bing were powerful search engine. Later, Google stepped in with user friendly gmail, youtube, googledrive, google maps, etc. and are useful applications. Students, researchers can get their relevant study and research materials easily via Internet.

Disadvantages of Internet

- Simply wasting the precious time on Internet by surfing, searching unwanted things.
- Lot of unnecessary wrong informations are sometimes posted by some people on their web pages, blog etc.
- Different types of thefts related to money and other valuables can take place through Internet as hackers and viruses are always active around.

10.2.1 The Internet Explosion

Internet is simply defined as the World Wide Web connection of individual networks operated by academic persons, industry people, government, and private parties.

4J6S5D

In few years, the Internet built itself as a highly powerful platform that changed our way we do business and the way we communicate. Internet promotes as the universal source of information of billions of people, at work, at home, at school.

As Internet is growing, markable evolution has come mobile technology and social web. These two innovations have changed the life style of people. We may find many communities in social web. Facebook was created in 2004 but today has more than 2,230 million active users. Mobile technology has increased the use of Internet all over the world.

The Internet allows all to be democratic in mass media. Anyone can have a webpage in Internet with very low investment. Similarly any business can reach a very large market directly, economically and fast, no matter of location or size of their business. Almost anyone that who can read and write can have a access and a presence in World Wide Web with very low investment. People everywhere can express and publish their ideas and opinions via blogging.

10.2.2 Growth of Computer Networking

The Internet is a global network of computers linked by high-speed data lines and wireless systems. It is estimated that the Internet links 50 million users in more than 80 countries world wide. This may increase to around 300 million in next five years.

Lot of difficulties were faced by the service providers (including Google) in expanding their residential fiber optic cables Internet service due to increased competition and installation cost from other broadband providers. Even though 4G LTE mobile network was not reached to many parts of world, the industry of telecommunication has been working hard on the development of their next generation "5G" cellular communication Technology. This 5G intense to boost up the speed the mobile connections dramatically. When 4G was initially being developed, companies did not wait to advertise about the 5G efforts.
